Lahore, Pakistan

PROFESSIONAL SUMMARY

Computer science student is passionate about **full-stack development**, **data engineering**, and emerging technologies. Experienced in developing scalable web applications using **Laravel**, **Python**, and modern frontend frameworks. Proficient in database management (**PostgreSQL**, **MySQL**) and cloud-based data engineering. Currently working with **Microsoft Fabric** to optimize data processing and visualization. Enthusiastic about learning **AI-driven** tools, **DevOps** practices, **microservices** architecture, blockchain, and cloud-native technologies.

EDUCATION

- **BS Computer Sciences**
Superior University Lahore
FEB-22 DEC-25
- **FSc - Pre-Engineering**
GOVT. College of Township (GCT)
2019-2021

EXPERIENCE

Nov-24 Feb-25

Data Engineer Trainee (Digifloat)

- Developed & optimized **ETL pipelines** for efficient **data processing** and integration.
- Utilized **PySpark** for **big data processing**, improving performance and scalability.
- Implemented **Docker** to deploy containerized **data solutions** for **streamlined workflows**.
- Managed **real-time data streaming** using **Apache Kafka** for fast and reliable data flow.
- Integrated **data workflows** into **Microsoft Fabric**, enhancing **data architecture performance** and ensuring **data integrity**.

TECNICAL SKILLS

- **Backend Development:** Laravel, Python, PHP
- **Frontend Technologies:** JavaScript, HTML, CSS, Bootstrap
- **Databases:** PostgreSQL, MySQL
- **DevOps & Tools:** Docker (Basic), Microsoft Fabric
- **Data Engineering:** ETL Pipelines, Data Warehousing, Power BI
- **Other:** Algorithms, Data Structures, Software Development Principles

PROJECTS

Data Warehouse for Business Intelligence

- Built a **centralized data warehouse** using **Microsoft Fabric** and **SQL** to enable **data-driven decision-making**.
- Designed and implemented **ETL pipelines** with **Azure Data Factory** for efficient **data extraction, transformation, and loading**.
- Developed interactive **Power BI dashboards** to deliver actionable **business insights** and enhance reporting capabilities.

AI-Driven Classroom Engagement and Behavior Monitoring System (FYP)

- Developed a **deep learning**-based system to analyze student engagement using facial expression recognition, eye-tracking, and posture analysis.
- Implemented real-time **computer vision models** with **OpenCV** and **TensorFlow** for accurate monitoring.
- Integrated a real-time **dashboard** for visualization and reporting of engagement metrics.
- Demonstrated expertise in **deep learning**, **computer vision**, and **UI development**.

WEB APPLICATION (EXPRESS_IT)

- Developed a full-featured **eCommerce platform** using **Laravel** for gym-related products.
- Implemented user **authentication**, product listings, **shopping cart**, and payment integration for a seamless shopping experience.
- Designed & managed the **database** to ensure **efficient** product handling and order processing.
- Demonstrated expertise in **web development**, **database management**, and **UI/UX design**.

CERTIFICATIONS

- Empowering the World with AI
- SCRUM Fundamentals Certified
- Certified PHP fundamental
- Responsive Web Design
